

The Chemical Coatings Division of Sherwin Williams is seeking an experienced coating Chemist with a Bachelors Degree in Chemistry to join our West Region Lab in Victorville, CA. Our Technical organization is committed to supplying quality products to our customers through the development and enhancement of new and improved products. Visit our web site <http://www2.sherwin-williams.com/chemicalcoatings> to learn more about our 140-year history of success, diverse products, services and opportunities to build a career as a Technical leader in our industry.

The desired candidate will be capable of resolving complex problems, developing new products/processes/technologies while maintaining existing product/process for assigned focus market area. This candidate must be capable of working independently planning resource needs, schedules, execution and documentation of work. Communication skills, business awareness and technical expertise including the capability to make recommendations based on technical approaches/processes are required. This individual may train and develop technicians. Thorough understanding of lab safety protocol in a team environment with limited supervision is essential functions of this position.

Experience Required:

Experience in product modification to existing technologies

2 component urethanes
polyester baking enamels
alkyds
water reducible alkyds
solvent born lacquers
latexes
epoxies
UV cure for wood coatings

To Apply:

Qualified candidates must have 2-8 years experience in the coatings industry, with proven experience in product development; **this is NOT an entry-level position**. Candidates must be eligible to work in the United States on a full-time basis, without sponsorship or restrictions. Candidates must be willing to travel up to 25% of the time. Excellent communication skills, demonstrated leadership ability, a good work ethic and an interest to work in an active "roll up your sleeves" type of environment are necessary qualifications.
